## The Service

The Multi-Media Service is published quarterly by TNS Media Intelligence, a wholly owned subsidiary of Taylor Nelson Sofres Company (TNS). This service reports expenditures in eleven major media: Magazines, Sunday Magazines, Newspaper, National Newspaper, Outdoor, Network Television, Spot Television, Syndicated Television, Cable Television Networks, Network Radio and National Spot Radio.

For the following list of categories, brands whose parent companies are unknown will be collapsed into the appropriate “not-itemized” brand for that category. These brands will appear at the end of the class to which they belong.

B129 FINANCIAL PRODUCTS & SVCS: COMB & NEC  
B190 FINANCIAL: COMB COPY & NEC  
B329 ORGANIZATION ADVERTISING: NEC  
B450 REAL ESTATE  
G300 RESTAURANTS  
T420 TRAVEL SERVICES  
T431 HOTELS & RESORTS, DOMESTIC  
T432 HOTELS & RESORTS, FOREIGN  
V110 APPAREL SERVICES  
V120 BUSINESS SERVICES  
V130 BEAUTY, HEALTH & MEDICAL SERVICES  
V140 FOOD & BEVERAGE SERVICES  
V150 MISC SERVICES  
V170 HOME & BUILDING SERVICES  
V180 TRANSIT SERVICES, LOCAL  
V190 MISC SERVICES: COMB COPY  
V241 AUTOMOTIVE REPAIR SERVICES  
V300 RETAIL  
V400 DEPARTMENT STORES  
V500 DISCOUNT DEPARTMENT & VARIETY STORES  
V600 SHOPPING CENTERS & CATALOG SHOWROOMS  
V800 DIRECT RESPONSE COMPANIES  
V900 MISC SVC,AMUSE,RETAIL,DIR RESP:COMB&NEC

Brands of companies spending less than \$250,000 year-to-date in the eleven media measures will be collapsed into the appropriate “not-itemized” brand for that category. If parent company identification is known, the threshold is applied at the brand level.

All brands in the Multi-Media Service are grouped according to the PIB classification. Network Television, Spot Television, Syndicated Television, Cable Television Networks, Network Radio and National Spot Radio data are edited to conform to PIB classifications. TNSMI is solely responsible for any changes in brand/product identification and any difference in the figures resulting from such changes.

## **Consumer Magazines**

TNSMI measures and compiles all paid advertising space and expenditure data for Publishers Information Bureau, Inc. Publications measured must be members of PIB, and currently number 350+ consumer magazines. Throughout the years, certain magazines are added and deleted from the service. The full list is can be found by selecting Consumer Magazines within the Media Set step and visiting the Properties tab.

House ads, contributed space and public service advertising are not credited in the service.

### Rates:

All full run revenues reported are based on current one-time open rates, excluding commissions, frequency, volume, remnant, spreads, category or multiple page discounts. No premiums are allowable, with the exception of bleed, color or cover premiums where applicable. Gross one-time rates are used to compute revenues for demographic editions; regional rates are supplied by publishers. Each member publication is required to supply a current rate card and marked issues of national editions. Marked issues give detailed information about each advertisement. Tear sheets of all ads appearing in regional/demographic editions must also be submitted. All new members are required to provide prior year issues of their publications for measurement.

### Not-Itemized Advertising:

Advertising in less than full run or sectional editions (regional, state, metro, demographic) with less than 5% of the publication's total circulation.

Advertising in directories including Schools & Camps, Financial, Kennels, Game Breeders, Where-to-Go, Real Estate, Restaurants, Hotels & Resorts, Postage Stamps & Coins, Business Propositions, etc.

Classified advertising (sold at the word rate).

Magazine buying networks (e.g. Media Networks, Inc., Women's marketing Inc.) advertising.

## **Sunday Magazines**

TNSMI measures Seven PIB Sunday Magazines:

American Profile

Life Magazine

New York Times Magazine

Parade

Relish

USA Weekend

West

## **Newspaper**

TNSMI Newspaper measures advertising space in over 250 Daily and Sunday Newspaper editions and Sunday Magazines.

Data for the Sunday magazines distributed with these newspapers are included with the exception of New York Times Magazine, Los Angeles Times Magazine, Parade, American Profile, and USA Weekend. (See [Sunday Magazine methodology](#))

Display advertising is initially classified into four areas: Retail, General, Automotive or Financial. General, Automotive and Financial are defined as national advertising. For Retail, newspaper data is collected on two levels. Regular Level 1 service includes all categories listed under Retail. Regular Level 4 service only includes selected retail categories. For each newspaper, data is collected as either a Level 1 service or a Level 4 service.

Data from the four newspaper-defined areas and categories are mapped into TNSMI harmonized brands along with the TNSMI harmonized category structure.

### **Newspaper Continued**

Display advertising expenditures are based on national open inch rates for General, Automotive and Financial. For Retail, volume contact rates are used. Where available, days of week or section specific rates are used.

Each month, TNSMI updates local newspaper rate card information so that our reporting system is utilizing the most current rate information available to us. Due to the late receipt of some rate card information, we create rate change effective dates that start prior to month the data was inputted. These changes are retroactively applied to the effective date.

### **Syndication**

National Syndicated programs and commercials are collected through a combined process of automated software comparisons and manual editing of National Syndicated activity in the TNSMI Spot TV Markets. The new methodology relies on frequency of program airings and a degree of consistency between Spot TV markets to identify Syndicated commercials.

A major advantage of this new methodology is that it is more reactive to industry changes than the former methodology. Since the data is collected from Spot TV markets, it represents commercial activity that actually cleared and is not 'idealized' as data from the satellites.

Effective with June 27, 2005 data reporting, we expanded our definition of a paid advertisement to include paid credit ads. Paid credit ads are typically 10 seconds in length but can be up to 15 seconds. They generally appear in pods containing only national ads and they tend to be placed at the end of these pods. Syndicators have referred to credits as being "built into the program." Our research has shown that these ads are considered paid activity and should be included in our reportable databases. Revenue estimates for these ads follows our established estimation process for all ad activity. The impact of these additional data represents an approximate 12.5% increase in ad time over comparable periods in 2004.

Prior to October 1, 2001 the methodology is as follows:

Under the former syndication methodology, TNSMI collected commercial activity and expenditure information for more than 200 programs per month through the 24-hour videotaped monitoring of four satellites and twelve transponders. TNSMI monitored as many top syndicated programs as possible given the configuration of our satellite receivers. Occurrence time was reported as the satellite transmission time, which did not necessarily correspond to any actual airing of the syndicated program. Therefore, Strategy custom dayparts and daypart reporting should not be used for Syndication reporting prior to October 2001.

### **Rates Sources**

The rates used to estimate advertising expenditures are developed from confidential information provided by ad agencies.

### **Rate Determination Process**

Agency information is received monthly and reflects buys from the prior month. Typically, agencies provide internal reports that list the program title, spot length, average cost (or grand total dollars) and the number of spots purchased. A computerized rates system averages all input by program, adjusting for differences in spot lengths to produce a final monthly rate for a syndicated program.

### **Cable Television**

The Cable Television Network Service provides commercial occurrences and expenditure information for 52 cable television networks. Cable Television is monitored via satellite 24 hours a day, 365 days a year.

#### Rates Sources

A combination of cable networks and agencies supply preliminary daypart and/or program rates. Each monitored cable network is contacted to solicit rate card information with varying degrees of success. Cable network submissions vary from monthly submissions to quarterly, yearly or none. Currently several cable networks do not supply TNSMI with rate card information. For these networks, agency submissions are used.

At the end of the month, the networks are again contacted for actual revenue totals. Revenue totals for networks that do not submit data are estimated.

### **Network Radio**

TNSMI currently receives data from the following networks:

ABC, American Urban, Premier and Westwood. The AM/FM Network (since merged with Premier) was collected in 2000.

Radio networks supply monthly brand/product-level expenditures for each of their Networks. TNSMI applies the given expenditures directly to the Network summaries.

Reports display summarized monthly expenditure information for parent, brand and category derived from the following radio formats: RADAR, Sports, Short Form, and Long Form programming (where provided). Network promotions and public service announcements are not reported in our Network Radio Service.

### **National Spot Radio**

TNSMI's National Spot Radio Service provides nationally placed spot radio data for approximately 4,000 stations in more than 225 markets.

Reported expenditures are based on audited billings from contract information provided by the following major national station representative organizations:

- ABC
- Allied
- Christal
- Clear Channel
- Cumulus
- D&R
- Infinity
- Katz
- KHM
- Lotus
- McGavren

Summarized monthly expenditure information is collected by market, and is classified according to parent, brand and category. Radio data are mapped to the 100 monitored TV markets, and to the All Other designation when appearing outside these markets. Monthly expenditures are pro-rated across broadcast calendar weeks, according to the number of days in each week that fall within the standard calendar month.

**Outdoor**

The TNSMI Outdoor Advertising Service reports billboard expenditures (poster and paint) in over 200 plant operator markets in the United States. Effective with January 1999, Outdoor Data Collection reports other types of out-of-home advertising beyond posters and paints; our current coverage includes 8 sheets, 30 sheets, bulletins, painted walls, transit/bus shelters, in-store displays, convenience stores, shopping malls, spectaculairs, taxi displays and truck/mobile advertising.

Brand expenditure data are provided by participating plant operators. The market-by-market dollar figures are not projected and represent actual gross sales volume for participating plant operators only.

Markets are defined according to Standard Metropolitan Statistical Areas (SMSAs). Outdoor data are mapped to the 100 monitored TV markets, and to the All Other designation when appearing outside these markets.

Plant operators submit information each quarter. Some operators provide data allocated by month. When data are provided as a quarterly aggregate the total is prorated into each month of the quarter.

If a participating plant operator provides data after a quarterly deadline, data will be reflected with the next quarterly update.

**Network Television**

The Network Television Service provides commercial occurrence and expenditure information for seven broadcast networks:

ABC effective January 1981

CBS effective January 1981

FOX effective January 1993

NBC effective January 1981

PAX/i effective September 1998 - Discontinued December 2005

MNTV effective September 2006

CW effective September 2006

This service continuously monitors the East Coast satellite feeds of these seven networks. TNSMI relies on networks to supply information on regional advertising. The networks provide the regional positions, the advertisers sharing each position and each advertiser's percent share of the buy. The information provided by the networks does not specify the particular regions covered by each share. Through the application, this activity can be shown separately by choosing the option in the sorts section.

The networks do not supply, nor does TNSMI report, information on sectional advertising.

## **Network Television Continued**

### **Rates Sources**

The rates used to estimate advertising expenditures are supplied primarily by the networks. TNSMI may also use information from other sources such as agencies and advertisers to determine the program rate. TNSMI maintains the confidentiality of the rates information received and their respective sources.

### **Rate Determination Process**

The networks send TNSMI average 30-second program rates by program title on a monthly basis after the completion of the monitored month. Once this information is received, rates specialists check it for consistency, completeness and special episode titling. Any discrepancies are resolved with the respective networks prior to publication.

### **Regional Buys**

Network provided percentages for each advertiser are applied to the program rate to estimate dollars for regional advertising.

### **Specials**

TNSMI normally applies a single rate to all commercials airing in a program during a given month. However, occasionally a network will dictate special rates for certain programs or spots within a program. TNSMI will apply specific rates to occurrences as directed by the networks, however, will not apply different rates for occurrences within the same commercial pod.

### **Spot Length Conversions**

Estimated advertising expenditures are assigned to every commercial based on the average 30-second rate for the program. When the commercial is longer or shorter than 30 seconds, the reported dollars are automatically converted in proportion to the number of seconds in the spot.

## **Spot Television**

TNSMI's Spot Television Service provides commercial occurrence and expenditure information for more than 600 English speaking stations and 35 Spanish speaking stations in 100 major markets. Spot Television is monitored 21 hours a day (5 a.m. to 2 a.m.) utilizing MediaWatch Technology. The monitored stations constitute the principal stations in each market and typically include the network affiliates, major independents, and Spanish affiliates. Public Broadcasting stations are not monitored.

TNSMI reports commercial occurrence activity as monitored. Atypical situations, of which TNSMI is aware, may be reported differently. TNSMI will not assign activity aired on one station to another station in cases where the second station buys the time slot and sells the spots. However, adjustments may be made to expenditures when a program or slot of time is simulcast. If this is a permanent arrangement, the units will be reported on both stations, but expenditures will be reported only for the primary station.

Network, Spanish Language Network, and Nationally Syndicated spots that air in the local markets are removed from the Spot TV medium.

### **Affiliations**

When affiliations change, only the current affiliation will be stored in the detail and summary records within the database, therefore, all reports will only show the current affiliation.

**National Newspapers**

TNSMI measures three National Newspapers: New York Times, USA Today and Wall Street Journal. All national and regional editions are measured.

Data for the Wall Street Journal and USA Today are measured within TNSMI's Magazine Service. Refer to the magazine tab for data collection and rates methodology. Data for the New York Times are measured In TNSMI's Newspaper Service. Refer to the newspaper tab for data collection and rates methodology. Because these services use different methodologies, advertising occurrence and expenditure information for these publications may be reported differently within each service.

Please note: Category B999 is exclusive to Wall Street Journal and includes all brands that ran 50 lines or less, too small to be classified elsewhere. All such brands are identified with "(W)" after the brand name.
